This is translated letter of your sponsored child

7 loving, Sona aunty- Zs Dobris,

First and foremost thank you very much for your both the letters and words of appreciation. I am glad to hear the encouraging words from you. Yes! You are right that English is little difficult for me but I like to try again to learn it. I passed your regards to my parents and brothers and they are happy and said to convey regards & warm wishes from my family members. I got your photo too. Comparing to your schools here in rural schools we do not have much outdoor activities its nice to hear that you are doing course and I am impressed, As I have sun in my village and people start to do a Job they will not think about going for further studies but you are very inspiration for me. I wish you all the best for your studies and profession but when people want to take a job in high post they start to take another degree. Thank you for detailed explanation about your summer holiday, Christmas and school. Through this letter I like to give you little news which took place from December to May.

I am studying in second semester of ITI COPA second year. This is my final semester and three months are there to complete this semester. May be my exams are in August or September; the time table not yet come. I learn about Java script. After completing this course I am interested to do another course. I will write you more about this in my next letter.

My brother Yogesh completed his tenth grade annual exam and waiting for the annual exam result. My second brother Prashanth completed his 8th grade and promoted to 9th grade. Now they both are enjoying summer holidays, here in summer it is a season of wedding celebrations, festival and carnival celebrations. They stay for some days in my nny's house. I am doing course because of that I don't have holidays. When there are programmes in my close relatives houses, I will take one day leave and go there.

At the centre, we had Awareness programme on leadership in service, through this programme they motivated us to take leadership in the villages while doing programmes.

Your name Sr. Maria Goretti gave me bag, books and umbrella. In that I gave some books to my brother. Thanking you and seeking your blessings I end this letter.

With regards from
Sona
